Exhibition in Germany: Alexander the Great and the Opening of the World

Ξένες γλώσσες / In English

Few figures in history have been as fascinating as Alexander the Great. In 323 B.C. he died at the early age of 32. His short life and his personality, his legendary march through the vast Persian empire, and the immeasurable impact and later effects have called forth countless stories and legends for more than two thousands years.

The exhibition ?Alexander the Great and the Opening of the World. Asia?s Cultures in Transformation? follows the course of the Macedonian king Alexander to Central Asia and thereby demonstrates the resulting cultural, economical and social upheavals to the visitors.
