

Limits of science (Saint Luke the Doctor)

[Ξένες γλώσσες](#) / [In English](#)

Can

science tell us how the great Prophet Isaiah foretold the most important events in the life of Christ 700 years before His birth? Can it explain the gift of foresight

which the saints have and tell us with what natural methods they acquired this grace? How is it that, on first meeting someone, they can immediately read their heart and thoughts? Without waiting for a question from visitors, they've given answers to what was troubling them. Let it tell us in what way the saints foretold great historical events which later came to pass exactly as they'd prophesied.
