It's of little importance (Saint Ignatius Brianchaninoff)

[Ξένες γλώσσες / In English](#)

People labour and struggle to acquire knowledge which is of only little importance

and is applicable for only a limited period of time. This is knowledge which contributes to meeting the needs, comforts and peculiarities of earthly life. We entirely neglect the essential, necessary knowledge and work, which are the only reason we've been granted earthly existence. That is, the knowledge of God and our good relationship with Him, through Christ our Redeemer.
