Queensland floods – photos

Ξένες γλώσσες / In English

Image not found or type unknown

Mate...some first hand pics. Perhaps the most rivetting pic to me is the tug boat going down the main street of the Brisbane Central Buisness District. It is the third largest city in Ozz, with a population of 3.3 million. Now the crocs are moving in, the one shown was in the Central Park in Rockhampton City , they are gorging on dogs . Now also the bloody snakes are everywhere, washed out of the bush and taken residence in abandoned houses in towns and the cities. No one knows yet the real cost of all this, but it will be just massive, and it is gonna hurt us. For the

most part, Australia is flat and is just a massive flood plain, and it all runs from north to south.

Happy days mate... (περισσότερα...)
