ASTROLOGY

This can be divided into two categories: a) The Zodiac: this has to do with the month in which we are born and b) Horoscopes: these are our everyday almanacs that depend on the position of the stars.

The Zodiac

Description: There are twelve signs (one for each month). They are called Libra, Scorpio, Aries and so on. People who concern themselves with these believe that: depending on the month in which you were born, you will belong to a certain zodiac sign. And depending on the sign you belong to, you'll have the particular character that goes with it. In other words, what you are doesn't depend on you but on your zodiac sign. The influence of each sign begins on the 21st of each month and runs through to the 20th of the following month. Scorpio, for example, belongs to

November.
